Course: SKCET - Programming in Java | **Topic:** Java Tokens, Data Types, Variables, Type Conversion and Casting, Operators

Total Questions: 15

Time Taken: 223 seconds

Question Type: Mixed

Completed At: 12 Jun 2026, 04:23 AM

Q1. Which data type is used to store a single character?

- A. char
- B. String
- C. int
- D. boolean

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: char is for single characters.

Q2. What is the default value of a boolean variable?

- A. true
- B. false
- C. 0
- D. null

Your Answer: B

Correct Answer: B

Status: Selected & Correct

Explanation: Default is false.

Q3. What operator is used for concatenation in Java?

- A. +
- B. -
- C. *
- D. /

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: + is used for concatenation.

Q4. Which of the following is a valid variable name?

- A. 1stVariable
- B. firstVariable
- C. first-variable
- D. first variable

Your Answer: B

Correct Answer: B

Status: Selected & Correct

Explanation: Variable names cannot start with a digit.

Q5. Which keyword is used for type casting in Java?

- A. cast
- B. convert
- C. instanceof
- D. as

Your Answer: C

Correct Answer: A

Status: Wrong Answer

Explanation: cast is used in casting.

Q6. What type of variable can be changed?

- A. final
- B. static
- C. local
- D. constant

Your Answer: C

Correct Answer: C

Status: Selected & Correct

Explanation: Local variables can be changed.

Q7. What is the result of 5/2 in Java?

- A. 2
- B. 2.5
- C. 2.0
- D. 3

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: Integer division truncates the decimal.

Q8. What will be the output of 'System.out.println(3 + 4 + " is a number")'?

- A. 7 is a number
- B. 34 is a number
- C. 3 is a number
- D. 4 is a number

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: Addition occurs before concatenation.

Q9. Which of the following is NOT a Java primitive type?

- A. int
- B. char
- C. String
- D. boolean

Your Answer: C

Correct Answer: C

Status: Selected & Correct

Explanation: String is not a primitive type.

Q10. Which of the following are valid data types in Java? (Select all that apply)

- A. byte
- B. fraction
- C. long
- D. float

Your Answer: A, C, D

Correct Answer: A, C, D

Status: Selected & Correct

Explanation: fraction is not a valid type.

Q11. Which of the following operators are unary operators? (Select all that apply)

- A. ++
- B. --
- C. +
- D. &&

Your Answer: A, B, C

Correct Answer: A, B, C

Status: Selected & Correct

Explanation: Unary operators operate on one operand.

Q12. Which of the following are valid ways to declare a variable? (Select all that apply)

- A. int a;
- B. float b = 1.0;
- C. String = c;
- D. boolean d;

Your Answer: A, B, D

Correct Answer: A, B, D

Status: Selected & Correct

Explanation: C is incorrectly declared.

Q13. Which of the following statements about type conversion are true? (Select all that apply)

- A. Implicit conversion happens automatically.
- B. Explicit conversion requires casting.
- C. Conversion can lose data.
- D. All types can be converted freely.

Your Answer: A, B

Correct Answer: A, B, C

Status: Wrong Answer

Explanation: Not all types convert freely.

Q14. Which of the following operators are used for comparison? (Select all that apply)

- A. ==
- B. !=
- C. >
- D. +

Your Answer: A, B, C

Correct Answer: A, B, C

Status: Selected & Correct

Explanation: D is an arithmetic operator.

Q15. Which of the following are features of Java? (Select all that apply)

- A. Platform independence
- B. Automatic garbage collection
- C. Multiple inheritance through classes
- D. Robustness

Your Answer: A, B, D

Correct Answer: A, B, D

Status: Selected & Correct

Explanation: Java does not support multiple inheritance.
