Course: SKCET - Programming in Java | **Topic:** Overview of Java, Features of Java, Structure of a Java Program

Total Questions: 15

Time Taken: 423 seconds

Question Type: Mixed

Completed At: 12 Jun 2026, 03:22 AM

Q1. What is Java primarily used for?

- A. Web Development
- B. System Programming
- C. Mobile Applications
- D. All of the above

Your Answer: D

Correct Answer: D

Status: Selected & Correct

Explanation: Java is versatile for various applications.

Q2. Which keyword is used to define a class in Java?

- A. class
- B. def
- C. function
- D. object

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: The 'class' keyword defines a class.

Q3. What does JVM stand for?

- A. Java Variable Machine
- B. Java Virtual Machine
- C. Java Visual Machine
- D. Java Version Manager

Your Answer: B

Correct Answer: B

Status: Selected & Correct

Explanation: JVM executes Java bytecode.

Q4. Which of the following is NOT a feature of Java?

- A. Platform Independence
- B. Automatic Memory Management
- C. Multiple Inheritance
- D. Object-Oriented

Your Answer: C

Correct Answer: C

Status: Selected & Correct

Explanation: Java does not support multiple inheritance directly.

Q5. What is the main method signature in Java?

- A. public static void main(String args[])
- B. void main(String args)
- C. int main(String[] args)
- D. public main(String[] args)

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: It's the entry point of a Java application.

Q6. Which operator is used to concatenate strings in Java?

- A. +
- B. &
- C. ||
- D. .

Your Answer: A

Correct Answer: A

Status: Selected & Correct

Explanation: The '+' operator concatenates strings.

Q7. What is the default value of an integer variable in Java?

- A. 0
- B. 1
- C. null
- D. undefined

Your Answer: C

Correct Answer: A

Status: Wrong Answer

Explanation: Integers default to 0 when uninitialized.

Q8. Which of the following are features of Java? (Select all that apply)

- A. Platform Independence
- B. Automatic Memory Management
- C. Low-Level Programming
- D. Rich API

Your Answer: A, B, D

Correct Answer: A, B, D

Status: Selected & Correct

Explanation: Java supports various advanced features.

Q9. Which of the following are valid data types in Java? (Select all that apply)

- A. int
- B. string
- C. boolean
- D. float

Your Answer: A, B, C, D

Correct Answer: A, C, D

Status: Wrong Answer

Explanation: int, boolean, and float are valid types.

Q10. Which statements about the Java program structure are true? (Select all that apply)

- A. It must contain a main method.
- B. Classes can be defined inside other classes.
- C. Packages are optional.
- D. Java supports function overloading.

Your Answer: D, A, B, C

Correct Answer: A, B, C, D

Status: Wrong Answer

Explanation: All statements accurately describe Java structure.

Q11. Which of the following are characteristics of Java? (Select all that apply)

- A. Object-oriented
- B. Portable
- C. Compiled and Interpreted
- D. Support for Pointers

Your Answer: A, C, D, B

Correct Answer: A, B, C

Status: Wrong Answer

Explanation: Java is object-oriented and portable.

Q12. Which components are found in a typical Java program? (Select all that apply)

- A. Classes
- B. Methods
- C. Variables
- D. Functions

Your Answer: A, B, C

Correct Answer: A, B, C

Status: Selected & Correct

Explanation: Classes, methods, and variables are key components.

Q13. Which exceptions can be caught in Java? (Select all that apply)

- A. Checked exceptions
- B. Unchecked exceptions

- C. Runtime exceptions
- D. Compile-time exceptions

Your Answer: C, D

Correct Answer: A, B, C

Status: Wrong Answer

Explanation: Java can catch checked, unchecked, and runtime exceptions.

Q14. Which of the following are valid Java comments? (Select all that apply)

- A. // This is a comment
- B. /* This is a comment */
- C. <-- This is a comment -->
- D. # This is a comment

Your Answer: A, B

Correct Answer: A, B

Status: Selected & Correct

Explanation: Java uses '//' and '/* */' for comments.

Q15. Which keywords are used for exception handling in Java? (Select all that apply)

- A. try
- B. catch
- C. throw
- D. finally

Your Answer: A, B, C

Correct Answer: A, B, C, D

Status: Wrong Answer

Explanation: All keywords are part of Java exception handling.
